### **MATERIAL SAFETY DATA SHEET**

### U.S. DEPARTMENT OF LABOR, OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, HAZARD COMMUNICATION STANDARD, 29 CFR 1910.1200

The Steco Corporation 2330 Cantrell Road P.O. Box 2238	Emergency Response: Information: Fax:	(800) 643-8026 (501) 374-4278
Little Rock, AR 72203	Date Reviewed:	August 15, 2011

TRADE NAME	TAP MAGIC ALUMINUM Cutting Fluid
CHEMICAL NAME & SYNONYMS	Hydrocarbon Mixture
DOT SHIPPING NAME	n.o.s., Combustible Liquid, NA1993, III, (Petroleum Distillate)
HMIS/NFPA CODE	Health 1; Fire 2; Reactivity 1; Specific - Solvent
MANUFACTURING CODE NO.:	8358
COMMODITY CODE NO.:	332-9150

### I. HAZARDOUS INGREDIENTS

CAS #	,	ACGIH TLV,	Other Limits Recommended	Max. %
8008-20-6	Not Listed	Not Listed	est. TLV	60
			1000 ppm	
111-82-0	Not Listed	Not Listed		40
8007-80-5	Not Listed	Not Listed		10

# **II. PHYSICAL DATA**

BOILING RANGE, (760 mm, Mercury) SPECIFIC GRAVITY (Water = 1) (lbs/gal) VAPOR PRESSURE (mm of Mercury) @ 75°F VAPOR DENSITY (Air = 1) SOLUBILITY IN WATER, % by weight EVAPORATION RATE (Butyl Acetate = 1) % VOLATILE BY VOLUME @ 75°F APPEARANCE ODOR pH		370 to 560°F 0.824 (6.88) Less than 5 5.5 Less than 1 (Insoluble) 0.04 Less than 1 Light yellow liquid Pleasant Neutral (Nonaqueous)
---	--	---

# **III. FIRE & EXPLOSION DATA**

LOWER FLAMMABLE LIMIT IN AIR (% by volume)	:	0.7
UPPER FLAMMABLE LIMIT IN AIR (% by volume)	:	5.0
FLASH POINT, PMCC	:	185°F
AUTOIGNITION TEMPERATURE	:	450°F
EXTINGUISHING MEDIA	:	Foam, Carbon Dioxide, Dry Chemical

		IV. HEALTH HAZARD INFORMATION
ROUTES OF ENTRY	:	Ingestion is the primary method of possible entry. Material will not pass the skin barrier. Inhalation is unlikely due to low vapor pressure.
EFFECTS OF ACUTE OVEREXPOSURE	:	<ul> <li>INHALATION: Concentration in excess of 1000 ppm may cause headache, nasal and respiratory irritation, nausea, drowsiness, fatigue, eye irritation and central nervous system depression. Narcotic effects may be severe at concentrations greater than 20,000 ppm.</li> <li>SKIN CONTACT: Material will not pass the skin barrier.</li> <li>INGESTION: Headache, drowsiness, nausea, fatigue, CNS depression. LD50 for rabbits is 28g/kg; estimated toxic adult dose 3-4 oz.</li> <li>EYE: May cause pain and irritation.</li> </ul>
EFFECTS OF CHRONIC OVEREXPOSURE	:	<ul> <li>SKIN CONTACT: Prolonged or repeated exposure may cause defatting of the skin and subsequent rash or irritation.</li> <li>ALL ROUTES OF ENTRY: Based on available data, repeated exposures are not anticipated to cause any significant adverse effects. Birth defects are unlikely. Exposures having no adverse effects on mother should have no effect on the fetus. In animal studies, has been shown not to interfere</li> </ul>

CARCINOGENICITY	:	with reproduction. Results of in vitro ("test tube") mutagenicity tests have been negative. Results of mutagenicity tests in animals have been negat Does not cause cancer in long term animal studies. Not a carcinogen or suspect carcinogen.
EMERGENCY AND FIRST AID PROCEDURES	:	<ul> <li>EYE: Flush eyes gently with water for at least 15 minutes. Supportive treatment by a physician is recommended.</li> <li>SKIN: Wash with mild soap and water. Remove wetted clothing until dry.</li> <li>INHALATION: Remove to fresh air. Individuals showing pronounced anesthetic effects may require artificial respiration and oxygen.</li> <li>INGESTION: Do not induce vomiting. Call a physician and/or transport to emergency medical facility immediately.</li> </ul>
NOTES TO PHYSICIAN	:	<b>ORAL</b> : Low in toxicity. Emetics are contraindicated due to danger of aspiration. If CNS Depression is prominent, nikethamide may be given parenterally. Avoid epinephrine. If and when warranted by special circumstances, gastric lavage may be performed cautiously with 3% sodium bicarbonate or water. Instill 30 to 60 ml of olive oil in the stomach at the conclusion of lavage and follow with a saline cathartic (sodium sulfate) in water.

#### V. REACTIVITY DATA

Chemical stability is great; odor and color may be adversely affected by prolonged storage in hot, moist environment. STABILITY : May cause swelling of some plastics and synthetic rubbers. Contact with strong INCOMPATIBILITY : oxidizing agents should be avoided. (Example: Oxygen gas under high pressure.)

HAZARDOUS DECOMPOSITION PRODUCTS: None, Incomplete combustion can yield carbon monoxide. CONDITIONS CONTRIBUTING TO HAZARDOUS POLYMERIZATION: None

### **VI. DISPOSAL, SPILL OR LEAK PROCEDURES**

AQUATIC TOXICITY SPILL OR LEAK PROCEDURES	:	Aquatic toxicity is low: Product is not soluble in water. SMALL SPILLS: Absorb with inert material (saw dust, rags, activated charcoal). Remove to out of doors and incinerate. LARGE SPILLS: Evacuate area. Contain liquid; transfer to closed metal (steel) containers. Keep out of water supply. Protect from ignition sources	
WASTE DISPOSAL METHOD	:	containers. Keep out of water supply. Protect from ignition sources. Small amounts may be incinerated in compliance with local, state and federal regulations. The recommended method of disposal for large quantities is recycling a reclaimer or incineration. "If inert absorbents are employed in spill containment cleanup, these absorbents must be <u>non-biodegradable</u> materials if destined for lar disposal. Suitable absorbents include natural minerals (clay), activated charcoal, man-made polymers (HD polyethylene)."	
NEUTRALIZATION			
CHEMICAL	:	Product may be effectively absorbed with activated charcoal.	
VII. SPECIAL PROTECTION INFORMATION			
VENTILATION REQUIREMENTS	:	Normal ventilation with regular use to maintain vapor concentration below 1000 ppm.	
SPECIFIC PERSONAL PROTECTIVE EQUIP		RESPIRATORY: None during normal use. Up to 2500 ppm, half-mask organic vapor respirator. Up to 5000 ppm, full-face organic vapor respirator, or full-face supplied air respirator. Greater than 5000 ppm, fire fighting or unknown concentration, self -contained breathing apparatus with positive pressure. EYES: None during normal use; face shield is recommended during machining operations. SKIN: None required for casual contact during normal use. Nitrile, neoprene or other petroleum distillate resistant gloves and/or boots recommended for dealing with large spills.	

# **VIII. SPECIAL PRECAUTIONS**

It is a combustible liquid, keep away from open flames. Do not ingest. Do not expose to ignition sources. Do not store with any strong oxidizers.

### IX. ADDITIONAL INFORMATION

<u>Tap Magic Aluminum DOES NOT CONTAIN 1,1,1-trichloroethane</u>, or any ozone depleting substances. Tap Magic Aluminum does not contain nitrites, nitrite derivatives, amines, polynuclear aromatic compounds either as an ingredient or a trace contaminant. Shelf life is indefinite at ambient temperatures and left in original containers.

Tap Magic Aluminum does not contain any chemical compound listed on the SARA list of "Extremely Hazardous Chemicals" and is in compliance with all of the requirements of the TSCA at the time of shipment.

Caution: Any cutting fluid can be "overworked" or "overheated", causing it to break down. This overuse is identified by the sight of or strong odor of vapors or fumes not normally present. The effects of these vapors or fumes on human health have not been fully determined. After use of this product, clean and lubricate metal surfaces to avoid staining and/or corrosion.
